Senator Maxey said the intention of the majority was to kill the bill by putting i an amendment that would render it in possible for the early friends of the bill to vote for it. Senator Williams could not support the oill, for as it now stood, it was an insulwas now dead as a door nail. Senator Williams had supposed if a brave and honest man ever existed on the face of the earth, a man not afraid of men or the

devil, it was the Senator from Illinois, Mr. Logan, the candidate of the Republican party for the Vice Presidency of the re-public. But even that Senator had shrunk back and been driven from a sense of duty. Oh." said Senator Williams, "shades leaders of the Republican party in it palmy days of its glory and power." The Mexican soldiers, he said, must want for their pensions till the government should come into the bands of the Democrats. The action on this bill was a disgrace to the Senator Wilson defended the amend he said, gave us a complete system, but it Mexican soldiers, and that is what we

want to have. Senator Morgan said the present object of course, was a political one to press the Democrats to the wall, to attempt to prove that they were opposed to pensioning Union soldiers, while the fact was they were not. He was satisfied it was the de liberate judgment of the Northern peop that such pensions should be now paid In the course of his remarks Senator Mor-gan said: "Take the candidate for the Presidency; to was a valuant talker in the war, but he never went to the war; he staid at home and accumulated his \$1,000 000 and his substitute went to the war." Senator Williams-No, he didn't, H got a furlough and remained at home. After alluding to the bravery of the soldiers on both sides in the late war. Senator Morgan said: "When you come (Senator Logan), who will stand secon on your ticket at the coming election, who was an heroic man both in Mexico and in the late war—when you speak about his plume—not the white plume of Navarre,

out the red pompon of the soldier, dipper in the blood of his adversary; when you come to speak of that in order that his soldier had been unpatriotic, half hearted, untrue—a man who had run from his flag. on. A. H. Garland DEAR SIE-My attention has been called to tock of the Pan-Electric Telephone Company WASHINGTON, D. C., January 5, 188

Washington, D. C., January 5, 1881.

Dran Sin—In reply to your question propoundcod in the note hereto attached, I begt to say: 1
have given the subject referred to much attention, and have closely examined several opinions
delivered by different courts in controversies between the Bell Telephone Company. Delber,
Spencer Ghegan, and others, and I am clearly of
opinion that the Pan-Electric, named by you,
in no wise infringes the Hell Telephone. From
the earliest decisions of our courts to the present,
although inventions may in their general principles be alike, yet if in their operation and working there is an essential or material difference,
there is no conflict to amount to an infringement.
This is recognized in the historic case of O Reilly,
vs. Norse, 15 How, U. S. Reps. 62, and in numerous decisions since that; but more clearly,
and with more direct application to the matter
now in hand, in Clough vs. Manufacturing Company, 160 U. S. Reps., 178 (October term United
States Supreme Court, 1882).

Without attempting any minute detail touching the inventions in question, I am satisfied—
thoroughly so—that the difference between them
is wider and more distinct than that recognized
by the court in the case 166 U. S. Reps., Sup.
The courts hold that a "Subdantial departure"
from a former invention is patentable without infringing. (Daff ex. Serring Pump Co., 187 U. S.

Thus guaranteed against infringement suits, and having secured rights in these marrelous instruments, and owning the various properties described above. The Rogers Telegraph and Telephone Company," incorporated under the laws of the State of New York April 21, 1884, was expitalized at \$6,000,000, divided into charge of \$100 cach.

It is possible that the Telephone stock alone—to say nothing of "the feature possibilisies of Electricity." may, like that of the Bell Company, which was capitalized at \$10,00,000, rise to very high prices; but for the sake of rapid construction, and to develop the rich mines of electrical discovery already in sight, the company offers to investors and speculators very rare opportunities—for holders of this stock hald, in effect, shares of all the above stocks.
